Visualization of Spatial and Spatio-Temporal Objects in Google Earth : 2021-10-30 : quincunx: REST API Client for the 'PGS' Catalog : 2021-10-30 : randtoolbox: Toolbox for Pseudo and Quasi Random Number Generation and Random Generator Tests : 2021-10-30 : RcppQuantuccia: R Bindings to the Calendaring Functionality of 'QuantLib' 2021-10-30 For example, I work with collaborators at NASA and NCAR on combining measurements from several satellites measuring CO2 on a global scale, on how to run related algorithms in parallel in modern distributed-computing environments, and on the real-time analysis of massive, streaming spatio-temporal datasets that are important for forecasting severe rainfall. Awesome Person Re-identification (Person ReID) About Me 🔆 Other awesome re-identification 🔆 Updated 2021-10-23 Table of Contents (ongoing) 1. Statistics 2. Survey 1) "Beyond Intra-modality: A Survey of Heterogeneous Person Re-identification", IJCAI 2020 [paper] [github] 2) "Deep Learning for Person Re-identification: A Survey and Outlook", arXiv 2020 [paper] [github] 3) …30-01-2021 · In recent years, traffic congestion prediction has led to a growing research area, especially of machine learning of artificial intelligence (AI). With the introduction of big data by stationary sensors or probe vehicle data and the development of new AI models in the last few decades, this research area has expanded extensively. In this paper, we will review some recent research on traffic congestion prediction. … PID-33: Approaches for Non-Functional Requirement Modeling: A Literature Survey Author: Saman Tariq: Online: 03:30 pm: PID-88: The Impact of Mitigation Strategies for Temporal Distance Issues in (GSD): A Systematic Literature Review Author: Attaur Rehman Online: 03:45 pm: Certificate Distribution: 04:00 pm: DAY 01 – Room 71The official journal of the American Medical Informatics Association. Publishes peer-reviewed research for biomedical and health informatics. Coverage includes 15-12-2021 · Urban scene modeling is a challenging but essential task for various applications, such as 3D map generation, city digitization, and AR/VR/metaverse applications. To model man-made structures, such as roads and buildings, which are the major components in general urban scenes, we present a clustering-based plane segmentation neural network using 3D point clouds, called …IBM Research – Almaden is IBM Research’s Silicon Valley innovation lab. Scientists, computer engineers and designers at Almaden are pioneering scientific breakthroughs across disruptive
technologies including artificial intelligence, healthcare and life sciences, quantum computing, blockchain, storage, Internet of Things and accessibility. In statistics, quality assurance, and survey methodology, sampling is the selection of a subset (a statistical sample) of individuals from within a statistical population to estimate characteristics of the whole population. Statisticians attempt to collect samples that are representative of the population in question. Sampling has lower costs and faster data collection than measuring the 01-01-2020 · Papers by Zhang et al. (2018b), Wu et al. (2019a), Chami et al. (2020) are the most up-to-date survey papers on GNNs and they mainly focus on models of GNN. Wu et al. (2019a) categorize GNNs into four groups: recurrent graph neural networks, convolutional graph neural networks, graph autoencoders, and spatial-temporal graph neural networks.05-11-2021 · A spatio-temporal analogue of the Omori-Utsu law of aftershock sequences Marianito R. Rodrigo* November 5, 2021 Abstract A spatio-temporal version of the well-known Omori-Utsu law of aftershock sequences is pro-posed. This ‘difusive Omori-Utsu law’ satisfies a nonlinear partial differential equation (PDE). AMultivariate, Text, Domain-Theory . Classification, Clustering . Real . 2500 . 10000 . 2011...
